# Rational and Irrational Numbers

## Textbook Exercise

## Answers

ID : in-8-Rational-Numbers [1]

Class 8

Rational Numbers

For more such worksheets visit [www.edugain.com](http://www.edugain.com)

**Answer the questions**

- (1) Find the 7 rational numbers between  $-\frac{7}{8}$  and  $\frac{6}{8}$ .
- (2) Write a multiple of  $-\frac{6}{-3}$  rational number?
- (3) What is the multiplicative inverse of  $\frac{4}{15}$ ?
- (4) Find the following and simplify it to lowest term:
  - A)  $\frac{-6}{15} + \frac{3}{6} + \frac{-3}{8} + \frac{1}{7}$
  - B)  $\frac{3}{6} + \frac{-2}{11} + \frac{-5}{11} + \frac{-6}{13} + \frac{-8}{2}$
- (5) Write the rational number that does not have a reciprocal.

**Choose correct answer(s) from given choice**

- (6) The rational number  $\frac{0}{-19}$ 
  - a. has a negative numerator
  - b. has neither a positive numerator nor a negative numerator
  - c. has either a positive numerator or a negative numerator
  - d. has a positive numerator
- (7) Which property is reflected by this expression,
 
$$\frac{12}{21} \times \frac{21}{12} = 1$$
  - a. Distributive Property
  - b. Multiplicative Inverse
  - c. Multiplicative Identity
  - d. Associative Property

Page 201 give my students this word search at the end of their 7th-grade year. This activity gives students a chance to practice their math skills while also learning the history of the Jack-O'-Lantern! To correctly complete this activity, students will need to be familiar with adding, subtracting, multiplying, and dividing unlike fractions, mixed numbers, negative and positive integers, and decimals. Included in this product: Types of Numbers Notes"Give an example" Practice Page (can be used as exit or entrance slip)Rational Numbers NotesIrrational Numbers NotesRational or Irrational Practice with guiding questionsRational and Irrational Numbers Drag and Drop ActivityRational and Irrational Numbers Color Coding practiceRational and Irrational Cut and Paste G'Students often need lots of practice with classifying rational and irrational numbers. To Solve the Riddlers, students must solve problems to assessThe Rational Explorations Escape Room/ Break Out includes five different tasks for students to demonstrate their understanding of the following: - Absolute value- Ordering/comparing integers- Translations and reflections- Understanding the coordinate plane- Distance on the coordinate plane- Converting fractions, decimals, and percentsThe tasks include teacher directions as well as student directions. For more teaching ideas, freebies and resources click on the **★Follow Me★** on my stores homepage.FOLLOW ME ON SOCIAL MEDIABlog | Pinterest | InstagramHeroes are not made overnight, they are developed with practice. Students will review repeating decimals, estimating radicals, exponent rules, square and cube roots, scientific notation, slope and y-intercept, solving equations with rational coefficients, systems of equations, scale factor and dilations, parallel lines cut by a transversal, Pythagorean Theorem, volume of a cylinder, and relative frequency in two-way tables. Each numbered line also is divided into different intervals. I love using Google Slides in my classroom. This includes a pre-test, post-test, and vocabulary quiz for every standard: 8.NS, 8.EE, 8.F, 8.G, and 8.SP. They need to do their Herowork! Upgrade your homework and classwork options with assignments that motivate your kiddos to battle all the way to the end of the page!Herowork is designed to be engaging repeated skill practice with a twist. The 10-question format makes test prep, review, and practice much more manageable! This resource is now available!Page 9Teach, review, and practice all rational number operations (adding, subtracting, multiplying, and dividing positive and negative decimals, fractions and mixed numbers) with this big bundle of notes, practice skills & word problem worksheets, task cards, and math review games! Each product in this bundle can be purchased separately in my store, as well, but this bundle offers 40% off the cost of buying each product individually! The bundle contains: 2 Sets of Notes, Practice, and ApplicationPage 10Enclosed, you will find:Notes - Adding, Subtracting, Multiplying, & Dividing Positive/Negative DecimalsHomework - Adding, Subtracting, Multiplying, & Dividing Positive/Negative DecimalsNotes - Adding, Subtracting, Multiplying, & Dividing Negative FractionsHomework - Adding, Subtracting, Multiplying, & Dividing Positive/Negative Fractions and DecimalsQuiz Review [Scavenger Hunt] - Negative/Positive Fraction & Decimal OperationsQuiz - All Operations with Negative/Positive FracPage 11All Operations with Rational Numbers Scavenger HuntStudents will rotate through task cards solving mathematical and real-world problems using addition, subtraction, multiplication, and division with integers, fractions, and decimals.DIRECTIONS:Print, cut, and laminate (optional) cards. Integer Addition Subtraction Activity - FREE8 puzzles/questions(match word problems, expressions, number lines, and answer)2. This product is designed for 6th grade after teaching the content; however, it makes a great revReady for the Bell High School math lessons provide a comprehensive set of print, multimedia resources, and assessments real world learning explorations.The lesson instructional design recognizes a new generation of learners, ones that expect multi-media, multi-modal learning opportunities and have the ability to access, research, and master knowledge creation opportunities whether they are at school or at home. Printable PDF & Digital Versions are included in this distance learning ready The Real Numbers System activity which consists of a set of 40 numbers that can be sorted into Rational vs. Students will match a graph, discontinuities, y-intercept, domain and range, and function equations for 12 different problems.This activity also includes a link to a digital version with purchase. Students will calculate, write, model, analyze and explain to show their understanding of the common core concepts. (This can simplify the solving of the puzzle.) Each square contains a large letter in the center. Puzzles 1 and 2 contain the same exponential expressions with rational exponents and answers, but Puzzle 1 has no distracting answers or exponential expressions along some of the edges. The Rational category flap can be lifted up to reveal the Integers category, whichRational and Irrational Numbers Bundleby Positively Pre-Algebra PlusRational and Irrational Numbers BundleThis bundle includes seven products for teaching rational and irrational numbers (the real number system) at a reduced price. An answer key IS included!You can try out a free sample unit of these task cards below.7th Grade Math Task Cards - AnglesPage 16With references for scatter plots, correlation, function vs not a function, combining like terms, one/zero/infinite solutions when solving equations, exponent rules, transformations, triangle sums, Pythagorean Theorem, systems of equations, squares, cubes, D=RT, rational and irrational numbers. Real number classification, prime numbers, proportional vs not proportional, linear vs nonlinear, scientific notation, root, radicand, radical and index, this word wall is a great addition to your 8th gradePage 17Get students out of their seats and reviewing eighth grade math with this interactive scavenger hunt. All task cards include a digital Google slides and printable option.Each task card includes 4-5 math problems for each of the following topics (49 total problems). How to factor the polynomial - ALL methods, and how to solvePage 23Included in this bundle are EDITABLE pre-tests, post-tests, and vocabulary quizzes on the 6th grade Common Core standards: 6.NS, 6.RP, 6.EE, 6.G, and 6.SP.This is a great bundle! Students will have a chance to perform well on their tests with the extra practice from the pre-tests.Included is a pre-test, post-test, and 3 vocabulary quizzes on the 6th grade Common Core standard Number Sense (6.NS).Students will:• Use fraction bars to divide rational numbers. • Perform basic operations on rational nPage 24A 13 day CCSS-Aligned Expressions and Equations Unit including: simplifying expressions, properties of operations, solving one-step equations, and solving two-step equations.Students will practice with both skill-based problems, real-world application questions, and error analysis to support higher level thinking skills. I have included slant (oblique) asymptotes only on the lastPage 5Are you looking for a highly engaging, no prep resource on operations with rational numbers? Students also match polynomial equations and their corresponding graphs. My students love using a cTarget Game - Rational Number Gamesby Estimate, compute and verify the sum, difference, product and quotient of rational numbers. Google classroom (Google Slides) and PDF Templates are included for both card sort activities.Distance learning?No problem! This activity now includes a Google Slides digital option!Explore the Distance Learning in my storeRational and Irrational Numbers Review Gameby This game can be used with or without an interactive whiteboard or projector to review identifying rational and irrational numbers with 16 questions. With two worksheets for each topic, you can use both or let students make a choice. Words in the grid are: area, associative, base, circumference, coefficient, commutative, constant, decimal, discount, distributive, equation, equivalent, evaluate, exponent, expression, formula, fraction, graph, inequality, integer, interest, irrational, linear, markup, mean, median, mode, negative, opposites, percent, perimeter, positive, power, prism, product, property, proportion, range, rational, sign, slope, subtractPage 21I know that I had a hard time finding a place for my students to practice using a number line with a variety of number lines. Rational numbers given include decimals, fractions and percents. 36 tasks that provide students with an opportunity to: \* add/subtract/multiply/divide decimals, fractions, and mixed numbers \* Practice integer rulPage 8Make sure your students are mastering the grade-level standards at a rigorous high-stakes testing level. Thank you so much for youPage 13With references for parent graphs for absolute value, radical, quadratic, exponential, logarithmic, rational, linear, constant, greatest integer (a step function version is also included), cubic and cube root functions, domain, range, increasing and decreasing in interval notation, zeros, vertex and axis of symmetry, this word wall is a great addition to your algebra 2 classroom.\*Spanish vocabulary words now included. For the first 5 sets, students are directed to order the rational numbers from least to greatest, then greatest to least for the other 5 sets. Students will arrange the movable pieces in the correct positions along the number lines.PDF: Complete the cut and paste activity using paper. You cPage 14Save yourself some time with these EDITABLE math assessments aligned to the 7th grade math common core. At the same time as providing current and multi-modal instructional methods and resoPage 22From an introduction to the polynomials unit (vocabulary words such as monomial, binomial, trinomial, term, degree, leading coefficient, divisor, quotient, dividend, etc.), then progresses deeper into the polynomials unit for how to calculate multiplicity, roots/zeros, end behavior, and finally sketching graphs of polynomials with varying degree and multiplicity. lesson videos for distance learning, homework, daily content quizzes, mid-unit and end-unit assessments, review assignments, and activities for Pre-Calculus UNIT 2: POLYNOMIALS, POWER & RATIONAL FUNCTIONS.What is included in each lesson?The unit is organizedPage 736 Operations with Rational Numbers task cards that include adding, subtracting, multiplying, and dividing rational numbers. Students find the domain, range, horizontal asymptotes, vertical asymptotes, holes, x - intercepts, y-intercepts, and slant asymptotes when applicable for 11 problems. More Info: MathFileFolderGames.com (Get all 42 Middle School Math Games here on TPT and save!!!)Rational Numbers Quizby This a quiz for Rational Numbers that includes creating a decimal from a fraction, creating a fraction from a decimal, creating a fraction from a repeating decimal, writing in exponential form and evaluating expressions that include exponents. This activity gives them that practice while reminding them of the characteristics of the respective number types. Integer Multiplication Set 8 puzzles/questions(match word problems, expressions, number lines, and answer)Rational Sets4. The key is included.This package includes two interchangeable puzzles that can be used by individuals or groups of two or three students. Each slide has a number line with different beginning and endpoints. A complete answer key is included. I have created some questions when students have to identify the location of a given point as well. Included are: • Rational Numbers PowerPoint Lesson. I love incorporating them into interThis foldable is a hands on alternative approach to the traditional Venn Diagram model of teaching the different types of numbers (Rational, Irrational, Integers, Whole, and Natural/Counting). Match numbers to their correct positions along the number lines.Card sorts are an excellent way to provide students with focused practice that is not tedious. By purchasing this Bundle you are savingPage 15This set of 7th grade math task cards includes problems related to decimals, comparing rational numbers, adding, subtracting, multiplying, and dividing fractions, negative exponents, and other concepts shown below. These TEKS & STAAR Aligned 10 Question Assessments are easy to incorporate as quick checks, review, practice, progress monitoring, guided math, intervention, and test prep! These STAAR Practice assessments are grouped by related standards/topics allowing for targeted practice. For the printable word wall, everything prints on 8.5x11 computer paper. They are now EDITABLE!!! Hence, you can decide if you want to add more rigor for your advanced classes or keep it more simple! It is up to you if you want to change any of the problems!Included is a pre-test, post-test, and vocabulary quiz on 8.NS (8th grade Common Core standard - Number System).Students will:1.) DetermiPage 26Ordering Rational Numbers: Combine your students' knowledge of fractions, decimals, percents, integers, mixed numbers, improper fractions, positives, and negatives into one big challenge! Working in teams or as a whole class, your students will compare and order the different types of numbers in all different formats from least to greatest. math centers, whole class practice, around the room, scoot, etc. This includes positive and negative fractions, decimals, mixed numbers and plenty of real world problems. The two different worksheets are Riddlers and Jokers. Two different difficulty levels are included, so you can either use both or differentiate easily. At the same time as providing current and multi-modal instructional methods and resoReady for the Bell High School math lessons provide a comprehensive set of print, multimedia resources, and assessments real world learning explorations.The lesson instructional design recognizes a new generation of learners, ones that expect multi-media, multi-modal learning opportunities and have the ability to access, research, and master knowledge creation opportunities whether they are at school or at home. When the puzzle is solved correctly, "RATIONAL EXPONENT" is spelled out vertically backwards!Contains 6 sets that can be purchased individually3 Integer Sets3 Rational SetsInteger Sets1. Grab the TPage 25This is a bundle including all of my 8th grade math assessments. How it Works Once assembled the only two categories that can be seen are Rational and Irrational. Irrational or Rational, Irrational, Integers, Whole, and Natural/Counting Numbers. One page has step-by-step directions with embedded definitions and students classify 100 numbers on another page by coloring them according to the directions. The coloring helps to motivate the students and makes it easy for you to spot if they're on the right track! This activity requires thatTypes:Students will practice classifying real numbers with this fun digital activity! Students will sort 15 real numbers into the categories of rational, or irrational numbers.Please view the preview file to make sure that this activity is appropriate for your students.This product includes the following:ALink to the digital activity on Google Slides including student directions,Answer keyThis activity is aligned to CCSS 8.NS.A.1.Interested in other 8th Grade Math Google Slides Activities?8.NS.1 ConvThis download includes both a PDF and digital Google Slides version of this activity.DIGITAL: Use the link to access a Google Slides version of this resource. 30 assessments covering rational numbers, expressions, equations, inequalities, proportional reasoning, proportional relationships, geometry, statistics, and probability. It is interactive, engaging, and fun, plus it is NO PREP for you. It's time to SIMPLIFY your teaching life, engaged students, no prep, YES please! Early Finishers Morning Work Math Centers Substitute TeachersThese are perfect for practicing number recognition, small motor skills, and usefulPage 3This breakout escape room is a fun way for students to test their skills with adding, subtracting, multiplying and dividing rational expressions. A 20 page PowerPoint lesson that includes vocabulary, examples of writing terminating decimals, repeating decimals, integers, whole numbers and mixed numbers as fractions, writing fractions as decimals, and comparing and ordering rational numbers. You can reach your students and teach the standards without all of the prep and stress of creating materials!Standards: 7.EE.1, 7.EE.2, 7.EE.3, 7.EE.4; Texas Teacher? Rational Addition Subtraction on a Number Line12 puzzlRational Numbers Assessmentby Questions on this assessment have students turning rational numbers into a/b form, ordering rational numbers on a number line, using < to write the rational numbers in order from least to greatest. Each section has a "Your TurnDecide if 18 numbers are rational or irrational, then color fall leaves according to the color chart. On several slides, students will place rational numbers on a number line. When the challenge is complete, a quote will be revealed. This assessment can be used as a quiz, test, classwork assignment, or homework assignment. UPDATE!! This now includes a digital pixel art with 20 questions! It's the best of both worlds: paper and digital!No prep!Self-checking \*Grade at a glance!ENGAGING!The digital activity uses Google Sheets, so your students need a Google account and/or Google Classroom.The colors in the preview images aren't the real answers, so if students Google the assignment, they are given false informaPage 2These SPANISH Halloween Color by Number activities will keep your students engaged in a calming math coloring page while YOU work with small groups, win win! You'll have enough mystery pictures to print a set for Math Centers, Early Finishers, Sub Tubs and Morning Work. The Irrational category cannot be lifted up (This shows students that there are no sub categories to Irrational Numbers). Students will also convert between fractions and decimals for problems that includPage 6This is a MEGA Bundle of guided notes with video lessons, homework, daily content quizzes, mid-unit and end-unit assessments, review assignments, and cooperative activities Pre-Calculus UNIT 2: POLYNOMIAL, POWER & RATIONAL FUNCTIONS. (Here's a video guide that walks you through how to upload a knockout game to Google Slides.) One thing to keep in mind is that the icons won't disappear when you go back to the main page in Google Slides.ThIntroduction to Rational and Irrational Digital Interactive Notebook for Distance LearningThis is the digital version of this product.

Do you want a fun and effective way to teach multiplication? Study.com offers an engaging video lesson and small group activity that makes it a ... BODMAS rule is an acronym that is used to remember the order of operations to be followed while solving expressions in mathematics. It stands for B - Brackets, O - Order of powers or roots, D - Division, M - Multiplication A - Addition, and S - Subtraction. Learn more about PEMDAS with concepts, definition, examples, and solutions. Steps to solve division problems 5th grade, a mixed number as decimal, multiplying decimals with whole numbers worksheets, Algebra Trivia Questions, graphing ellipses, rational numbers greatest to least convert, ratio and proportion tutorial. 5th grade Learn fifth grade math—arithmetic with fractions and decimals, volume, ... These materials enable personalized practice alongside the new Illustrative Mathematics 6th grade curriculum. ... Rational and irrational numbers: Class 8 ... 1/5/2022 · Use of verbs grade 1. Past tense of regular verbs grade 2. Worksheets Kindergarten Reading ... May 1, 2022. Worksheets reading grade 2. Our grade 2 math worksheets compliment our second grade program. Practice Reading Vowel ... This math worksheet helps your child understand place value by reading and writing 5 digit numbers. Place That's because Khan Academy has over 100,000 free practice questions. And they're even better than traditional math worksheets – more instantaneous, more interactive, and more fun! Just choose your grade level or topic to get access to 100% free practice questions: Early math; Kindergarten; 1st grade; 2nd grade; 3rd grade; 4th grade; 5th ... Singapore math printable worksheets sample problems, water worksheets for grade 2, answers rational expressions, when solving a rational equation why is it necessary to perform a check, online graphing calculator TI-84 emulator, algebra for ... Learn about Geometric Mean Formula topic of Maths in details explained by subject experts on Vedantu.com. Register free for online tutoring session to clear your doubts. Use Fraction Lottery to practice fractions in your class. You'll need to prepare chips with different numbers on them (1 through 20). Make sure you include each number twice, i.e. you should have 40 chips in total. Also, bring a large vessel where you'll put the chips. Divide the class into several groups of 3, 4 students We offer highly targeted instruction and practice covering all lessons in Pre-Algebra. Start now for free! ... 69 Determining if a Number is Rational or Irrational Rational and Irrational Numbers, Rational vs Irrational, rational and irrational, ... I was able to place into my appropriate college algebra class, ...
